I told her about the concrete so I wouldn't dive into an event. She just mentioned her availability. I would rather Jason focus on solving the concrete issue.

Thanks for connecting the R5 people with DTSC.

**Subject:** Re: From my update with Alexis - follow up

I connected the DTSC Exide people with the R5 geospatial person who developed the East Chicago data management system and geo-viewer, when I came back from the removal managers meeting in early Dec. The POC in R5 is Brian Cooper.

Fruitland - we can look at a media event for 1/19. Jason Musante is still tracking down some options for additional sealing of the concrete, because we've found some contamination embedded in the concrete. So we are not 'done' done but visually the place looks great and should suffice for an event. Ideally it would be better to have everything wrapped up with a bow on it...
